Name: Noor Omar Abdikadir
Years Of Web Dev: 2 years

1. What kind of website are you wanting to build?
No preference.

 2. What features do you want to specifically contribute to?
Front-End: forms, animations, transitions, wording, etc
- From the Document Shared: Membership & Profile

3. What features don't you like?
- Not a large issue but the mentorship.
I didn't think we'd be taking this route so that's why I'm slightly against. However, if we can find good mentors who can explain things well, I'm all for it. I just doubt that we will that's why i'm opposing.

 4. What features would you add to the current feature list?
Membership Ranking based on community involvement.
Notification reminder updating people on what's recent.

 5. What or the basic, crucial needs required for day to day usage?
Daily Updates such as recent events: News, Weather, Incidents occurring in Tucson/Arizona etc.
Daily Tips, Inspirational messages

6. Do you have any changes to suggest to any of the features?
No

7. Do you have any changes to suggest to the process we are using?
Request for everyone's available schedules. Just to see how often we can meet up & from this hopefully we can have a rough estimate of how much progress we can make.

 8. Do you know about the Software Development Life Cycle (SDLC)?
Yes!

 9. Do you know about Agile methodology?
Yes

10. Please describe your software development experience.
I'm very comfortable with problem solving. I'm able to read code & debug more than I can code. However, despite how much I know, I feel like I don't know anything so I often times catch myself on Stackoverflow or a FB group discussion every 5-10 minutes or so. But I always know

where to look for resources. I've built a few portfolio's & expected to upload my first one this summer. I've volunteered to help a non-profit this summer with their website. Turns out it was wix, I rarely got to ever use any of my programming skills but I got a taste of web design.

11. Please list your skills
HTML, CSS, Basic JavaScript, Basic C++
Others: Cellphone & Computer Technician
12. How many hours per week can you realistically commit to our project?
Present - July: 8 hours

After that I have school so I can't make any promises but I can try to squeeze in 7-13 hours.
.
13. What concerns do you have about our project?
None

14. Do you have a preferred task management system?
No. . . I've never used one yet. First time hearing of it really but I may know it's purpose.

15. Is there anything else that you would like everybody to know?
I'm currently a student still in highschool (class of 2018). I'm taking AP's so my availability will fluctuate due to that & clubs I'm needed in (Robotics,MESA,NHS etc).
But regardless, I'm always up for a challenging & willing to collab with anyone. Perhaps come to someone's house or meet up somewhere & code.

I'm always willing to help others. So if you ever catch yourself stuck with a code or lacking fast internet or just simply want help from a buddy, I'd be more than willing to give my assistance. I personally believe that it'd be more beneficially to both parties rather than to copy & past.
